Re: Case #2016-3835: 133 139 Cedar 233 Pereida Street - *King William District*  
Certificate of Appropriateness – Landscaping

Dear HDRC Commissioners,

The King William Association Architectural Advisory Committee met to review the project and concurs with the OHP staff recommendation for approval. Although the material pallet showed a photo of river rocks, we were not able to locate where they are planned to be installed on the site plan. We request that the applicant not use river rocks near any of the public sidewalks as they are tripping hazards. The use of pea gravel is more appropriate.

Best Regards,

Mickey Conrad  
Chair, Architectural Advisory Committee

Harry Shafer  
President, KWA Board of Directors
