Re: Case #2016-1336: 100 E. Guenther – *King William Historic District*
Conceptual Approval – Sustainable Stormwater Management

Dear HDRC Commissioners,

The King William Association Architectural Advisory Committee met to review the project and endorses the OHP staff recommendation of approval for the permeable pavements and bio-retention features.

The AAC does however have concerns about the location, sizes and materials of the proposed cisterns. 3 of the 5 cisterns are clearly visible from the river walk and Guenther St. We respectfully request that the applicant revisit the proposed locations, sizes and landscape screening of the cisterns to better visually integrate them into the context of this Historic District.

Best Regards,

Mickey Conrad, AIA
Chair, Architectural Advisory Committee

Harry Shafer
President, KWA Board of Directors
