Re: HDRC Case #2017-271 - 303 King William. – *King William District*
Certificate of Appropriateness to allow unpermitted fencing.

Dear HDRC Commissioners,

The King William Association Architectural Advisory Committee reviewed the project and do not concur with OHP staff recommendation for approval for the following reasons:

1. The proposed low (16"-18" high) spear topped fence is a safety hazard if someone were to trip and fall on top of it.
2. It serves no purpose being just 12" away and parallel to the existing fence.
3. There is no precedent, historic or otherwise, in the neighborhood for this high/low double fence application.

We respectfully request that this unauthorized installation be removed.

Best Regards,

Mickey Conrad
Chair, Architectural Advisory Committee

Chris Price
President, KWA Board of Directors
